I am extending this formal complaint.

It has been found that Charles has removed me from another talk group silently on the same date, the metal shop teachers group. However, he has not removed me from being a teacher within the metal shop. This talk group is for members to reach out to teachers and he's attempting to use it as a covert-communications channel. If Charles wants to start PM threads with specific people that's fine, but he can't be hijacking talk groups. During the time when we told him this was not appropriate he conveniently forgot to mention he had removed me from this group.

All,

Charles Proctor has been abusing his position to attempt to manipulate votes and discussion within the metal shop, and according to multiple members has been bad mouthing myself and Freddy behind our backs to try and discredit us and our concerns to shape upcoming committee votes.

Most egregious, he has started Gatekeeping access to the Metal Shop Committee Talk list to hide discussions from the membership at large as well as Freddy and Myself, two of the most active metal shop committee members.

I am recommending that Charles be removed as chair \*immediately\* due to damage actively being caused to other members and his attempts at evading committee vote requirements by removing members who disagree with his propositions.

Regards,  
~Tails
